

The essential data trust layer for Snowflake & beyond

Cortex Code, Snowflake Intelligence, and analytics are only as reliable as the data feeding them. Ataccama ONE unifies data quality, observability, governance, and reference data in one agentic data trust platform, so your Snowflake data is validated, governed, and AI-ready from day one.

01 Shift data quality to the left

Profile legacy sources, identify quality issues, apply rules, and bring cleaner, governed data into Snowflake from the start.

02 Run quality checks natively

Get business and engineering teams in sync with one rulebook defined with AI and applied everywhere with Snowflake SQL rules running as DMFs.

03 Detect issues in motion and fix it early

Use data pipelines observability and DQ Gates to check, block, quarantine, and fix bad data before it reaches bronze, silver and gold layers.

04 Add business context to technical data

Enrich technical metadata with data owners, business definitions, quality scores, lineage, and certify data with the Data Trust Index.

05 Connect trust signals to AI workflows

Bring quality scores, business context, and Data Trust Index signals into Snowflake Intelligence, Cortex Code, and your AI stack through MCP.

Why Snowflake customers choose Ataccama

- ✓ **Accelerate Snowflake migrations**
Bring cleaner, governed data into Snowflake earlier, so data modernization programs do not stall in remediation.
- ✓ **Manage data at AI speed**
Monitor data quality continuously and catch issues upstream. Do it all with the ONE AI Agent – your digital data steward.
- ✓ **Simplify your data architecture**
Use one unified data management platform across Snowflake and the rest of your data estate.
- ✓ **Capitalize on your Snowflake investment**
Procure Ataccama ONE through the Snowflake Marketplace using your existing capacity commitment.
- ✓ **Trust data for AI & BI**
Support Cortex Code, Snowflake Intelligence, analytics, and machine learning with validated data and trust signals your AI agents act on.
